

Imagine The Possibilities

Thrashers Laminate Definitions of Standard & Up-charge Finishes

The majority of all Thrashers orders are produced in laminates offered from Wilsonart®, Formica®, Nevamar® and Pionite®. There are a number of finishes to select from which are standard and a number of finishes that carry up-charges as well as extended delivery times. To help understand the differences between what is standard and what is not, Thrashers has listed a summary of each manufactures code numbers and finish descriptions. Please contact us to verify if there is a percentage up-charge applicable and lead time before placing an order.

If more clarification is needed about the preceding list of finish codes please visit each manufactures web site listed below or contact Thrashers. Note Nevamar® & Pionite® are owned by the same company Panolam Industries®. Due to pattern scale and color variations in computer monitors and printers we strongly recommend viewing the actual sample before making a final color selection. Samples may be ordered directly from the manufactures listed above or thru Thrashers.
